COLLABORATE!

**ITS OUR KEYWORD.
OUR NETWORK WILL BE
YOUR NEW TEAM IN OFFICE,
IN CONSTRUCTION FIELD,
IN OUTSOURCING.**

SPECIALISED PARTNERS

Our specialists will always be yours available, in office, online, on site for the best organization of the works. A tutor will coordinate the order/project with you 24/7.

HARDWARE AND SOFTWARE

We have the best software platforms, always updated and available on site and in cloud, as well as hardware suitable for each type of order.

EFFICIENCY & MANAGEMENT

One of our must! Efficiency and control of management it means safety for the customer. Our teams are trained in advanced problem solving, to respond calmly and safely to every problem in every phase of the order/project.

DINAMIC OFFER

All our offers are dynamic, developable over time and on customer needs. All our services are efficient individually and can be integrated to form packages useful to full manage order.

04.

Why us

Here's an example of complex multi-service order to help you understand better how we can work for you.

TAKE PART IN A DESIGN COMPETITION FOR A NEW TOURIST VILLAGE IN A FANTASTIC SEASIDE RESORT. A SERIES OF HOUSES, THE DESIGN OF THE COMMON AREAS, CATERING, A CINEMA/CONGRESS CENTER, THE GARDEN PROJECT.

Starting from the concept and versioning phase, our BIMarch team from Ubim will support the design office in the implementation of the BIM process and in the management of the models. We will take care of the modeling in the required LOD, simulations, material libraries, construction details, clash, print layout and layout.

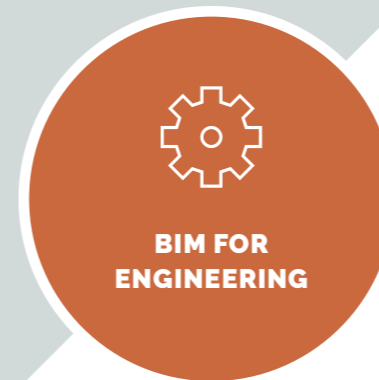

EACH ORDER WILL BE AN "OUR" PROJECT.
YOU WILL HAVE CUSTOMIZED, EFFICIENT AND RELIABLE SERVICES.

The building site is now closed, thanks to the BIM process there were no variations, the management of the site was efficient, fast and cheapest. Now, thanks to the federated BIM models, the village can be viewed by the facility manager in cloud, via tablet, in complete mobility, managing notifications and alarms in real time.

The project already from the early stages of conceptual design needs a series of interventions in marketing and communication. From the first meetings with the client, passing through official and institutional presentations, to print and web advertising for the sale of the project, our Ubran AECO team can follow all the communication phases of the project.

From the concept phase, our BIMeng team from Ubim will be available for the structural and MEP engineering of the entire project. We will deal with the management and implementation of specialized models and their integration into the federated file, which will be the subject of clash detection ongoing with the architectural model.

UFM AND UBIM TEAMS ARE ALSO SPECIALISTS IN BIM RESTITUTION OF EXISTING AND HISTORICAL BUILDINGS FROM OLD PROJECTS OR EVEN DIRECTLY FROM A 3D SCANNING PAD FOR VIRTUALIZATION OF FACILITY MANAGEMENT FACILITIES.

05.

Our Works

Best of our masterpiece through the years of successful work in AEC industry

We count on a staff of specialists accustomed to dealing with international clients, able to meet any needs, from those bases to the most advanced, in basic and/or integrated/complex solutions. Studio30 will be your global service to accompany you at 360 ° in your projects and activities. Here are just some examples of our work, but for more details scan the QRcode and view our full portfolio.
